Oral, Poster contribution

Original contributions on thermal spraying and recent developments on suspension thermal spraying are accepted. We mainly expect contributions devoted to the analysis of spray processes, sprayed coatings characterizations (microstructural, optical, mechanical, physical, chemical...) and on recent methods such as suspension spray and cold spray. The papers related to post spray treatments are welcome. Environmental and energetic aspects of thermal spraying will be particularly of interest during this 6th edition. Additionally, the contributions related to the coatings applications and their functional properties are kindly invited.

Industrial exhibitions

- Thermal Spraying
(process, diagnostics...)
- Materials for Spray
(powders, precursor...)
- Characterization of the deposits
(mechanical tests, porosity...)
